

Who We Are

Introduction

Using experienced First Nations firefighters, G&G Fire Consulting plans to become a leader in emergency services training specifically designed for First Nations.

Through this specialized training, G&G Fire Consulting will empower First Nation residents to deliver effective fire prevention and emergency services to their communities.

G&G Fire Consulting will create a positive environment that is focused on fire safety, prevention and awareness.

Using trained firefighting professionals, G&G Fire Consulting will provide effective specialized emergency service training for First Nation communities and reserves.

An Investment in
our children

**We need to
work together to
prevent injury,
protect property
and most
importantly, to
save lives.**

Teaching Fire Safety in our Schools

Our services will be sponsored by our community partners to help us deliver the three phases of our fire safety programs:

- Phase I – Safe Environment
- Phase II – Training
- Phase III – Support & Maintenance.

Phase I includes the Save a Life fire prevention school program, while the final two phases provide training and support for adults and the community.

The Save a Life program requires funding from community partners. Our other programs will be financed through government grants and business operations.

We will provide teachers in First Nation communities with a resource package that fits into their existing curriculum. Our company will visit each school and provide hands on education in a fun and entertaining manner as part of the program. There are 90 first nation schools in Saskatchewan. Our goal is deliver the program to 30 schools per year.

The main takeaways from the Save a Life program are:

- Safety tips for how to prevent a fire
- What to do if there is a fire in your home
- How to create an effective fire exit plan for your family
- What to tell a 911 operator

Fire Facts

- **A federal government study noted that a First Nations people are 10 times more likely to die in a fire than the rest of the population**
- **There are about 24,000 house fires each year in Canada, resulting in an average of 375 deaths and 3,000 injuries per year**
- **In Canada, 1 out of 100 preventable residential fires are fatal**
- **Children need to have an understanding of fire protection in order to have a better chance of preventing a tragedy.**
